PROFESSIONAL SUMMARY

Detail-oriented Artificial Intelligence and Data Science undergraduate with hands-on exposure to data analytics, business intelligence, and dashboard creation through the Deloitte Data Analytics Virtual Experience Program. Proficient in Python, Tableau, and Power BI, with a strong foundation in data visualization, exploratory data analysis, and insight reporting. Passionate about transforming raw datasets into actionable business insights and eager to contribute analytical thinking to a data-driven team as a Data Analytics Intern.

SKILLS

Python, Pandas, NumPy, C, Java, Tableau, Microsoft Power BI, Matplotlib, Google Looker Studio, Microsoft Excel, Google Sheets, Data Cleaning, Exploratory Data Analysis, Dashboard Creation, Data Storytelling, GitHub, VS Code, Google Colab, Statistical Analysis

WORK HISTORY

Data Analyst 01/2026

Deloitte | Virtual Experience Program (Forage)

- Analysed a simulated business dataset to identify patterns, inconsistencies, and data quality issues, applying structured data cleaning and validation techniques.
- Built an interactive Tableau dashboard to visualise key business metrics and analyse trends.

Artificial Intelligence Intern 06/2026

Codec Technologies | Artificial Intelligence Internship

- Learned about natural language processing, RAG, LLMs, and vector databases.
- Built a rule-based AI chatbot for customer service to resolve user queries.

EDUCATION

B.Tech, Artificial Intelligence and Data Science Expected 01/2029

V.S.B. College of Engineering & Technology, Tamil Nadu

- Relevant Coursework: Statistical Analysis, Python, C and Java Programming, Data Structures & Algorithms, and Data Science.

Higher Secondary, Class XII 01/2025

Shri Vinayagar Matric Hr. Sec. School, Tamil Nadu

- Scored 91% — strong performance in Mathematics.

Secondary, Class X 01/2023

Shri Vinayagar Matric Hr. Sec. School, Tamil Nadu

- Scored 93% — consistent performance in Mathematics, Science, and Social Science.

CERTIFICATIONS

- Data Analytics Job Simulation — Deloitte / Forage, 2026 | Dashboard building, data interpretation, and forensic analysis in Tableau.
- Basics of NumPy — Infosys Springboard, 2026 | Array implementation, data cleaning, and structuring.

- The Complete AI Guide — Udemy | Data workflows, ML fundamentals, feature engineering, and Python for data science.
- Introduction to Cyber Security — Simplilearn | Data privacy, network security fundamentals, and threat mitigation.
- Python Foundation Certification — Infosys Springboard | Python fundamentals, data types, control structures, and problem-solving.
- TCS iON Career Edge — Young Professional — TCS iON | Workplace communication, professionalism, and career readiness.

PROJECTS

ALPHA — Hybrid AI Assistant

March 2026

Python | LLMs | NLP | Local Inference

- Engineered a hybrid AI model that can work in both online and offline modes, personalized for learning with multiple message processing layers.
- Used the Ollama model for offline functionality.
- Outcome: Implemented an LLM model and natural language processing, and initially deployed it as a website.

KnoVault — RAG-based Study Guide

June 2026

Python | LLMs | NLP | RAG | Web Development

- Created a RAG model with a vector database that stores students' notes — in PDF, PPT, DOC, and Excel formats — using chunking, and retrieves topics and answers to questions asked by the user.
- Used an LLM to structure the chunks for formatted results.

CodeTrack — Analytics Dashboard for Students

July 2026

HTML, CSS, JavaScript | APIs | Python

- Developed an analytical dashboard for tracking students' performance on LeetCode and GitHub.
- Used API keys to fetch data via students' LeetCode usernames and GitHub profile links; used Python to analyse performance and generate graphical representations, displayed on the website using HTML, CSS, and JavaScript.

LANGUAGES

Tamil (Native) | English (Professional Proficiency)
